

Safe, secure and configurable solutions that grow with you.

Our highly skilled experts are committed to service and to finding the right fit for your space, power and bandwidth needs. Our data centre solutions are designed to be highly scalable, as your business grows, your IT infrastructure is always-on and available.

Our colocation services are designed to fit your business:

Hybrid solutions give you choice

- From single cabinets to cage deployments, we design solutions tailored to the size of your business and density requirements.
- Take advantage of Shaw Business' diverse fibre network for end-to-end connectivity, bring in a carrier of your choice, or use a combination of both.

A trusted team at your fingertips

- A skilled team of engineers are onsite to provide instant access to your data and 'Remote Hands' serve as an extension of your business.
- Our experts are highly trained. From power and cooling operations to security controls, we handle the heavy lifting to allow you time to focus on your core business.

Safe, secure data facility

- Our controlled facility features multiple zones of security including biometric authentication, mantraps and 24/7/365 physical security monitoring.
- High resolution video surveillance offers an additional tighter layer of security that will leave you with peace of mind.

We'll manage everything for you.

Think of us as a complement to your IT department. Our highly trained team is with you every step of the way.
